THE STORY

01 The Problem? There Isn't One.

Dermatology billing is a systems game. High volume, small balances, fast-moving payers — it only works when a solid billing team and a solid front office run as one machine: eligibility nailed at check-in, claims out clean the first time, balances resolved before anything has a chance to age. This isn't a turnaround story. This is what well-oiled looks like.

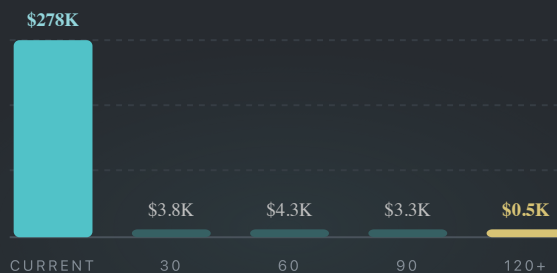

02 How It Runs

- ▲ **Front office and billing in lockstep** — eligibility and benefits verified before the patient sits down.
- ▲ **Claims out clean the first time** — steady reimbursement without churn or rework.
- ▲ **Nothing left to age** — 96% of the book current, \$543 past 120 days. Five hundred forty-three dollars.
